PROJECTS

Train Together (https://github.com/felixc0115/train-together)
- Designed, developed, and implemented a full-stack app for users to upload, manage, and track training programs resulting in a reduction in overall exercise preparation and workout time
- Created a front end built in React with Tailwind and Redux for state management
- Developed a REST API using Node.js with Express.js framework that communicates with the front end and retrieves data from MongoDB using Mongoose ODM

Woof & Whiskers (https://github.com/felixc0115/beyondmd-react-django-postgres-app)
- Designed, developed, and implemented a full-stack web app aimed to match adoptable pets with interested users
- Created a front end built in React with MUI and Redux for state management
- Developed a REST API using Django that communicates with the front end and retrieves data from a PostgreSQL database

Miss Vietnam Florida (https://missvietnamflorida.com/)
- Collaborated with a developer to build a modern and responsive website using best practices for potential Miss Vietnam Florida pageant applicants resulting in a five hundred percent increase in applicants
